

Housecall Pro + Dispatch

Why Connect Dispatch with Housecall Pro:

Dispatch will push jobs sent to you from brands you work with into your Housecall Pro account in real-time. Jobs will enter your HCP account as “Unscheduled” with customer information, a description in the jobs notes, and a tag for Dispatch so there’s no need for additional data entry or manual effort. Once a job is completed in HCP, the status will automatically be reflected in Dispatch - super simple and no added costs involved!

How to Get Connected:

1. Make sure you already have an account with Dispatch and Housecall Pro
2. In Housecall Pro, navigate to the Dispatch app page, select “enable app” and accept the terms.
3. After you accept, your app will move into processing. Dispatch will match your Housecall Pro profile with your Dispatch account to ensure you are properly linked up.
4. Once you’re linked up, you will receive an email from Dispatch letting you know that you’re ready to go! This process may take up to 1 to 5 business days. To check your status, please email Dispatch directly: Support@dispatch.me
