

Reach Potential Patients Using IQVIA's Privacy-assured Tailored Audience Offering

Connect your brand's messaging to the most relevant consumer cohorts

IQVIA non-identified, person-level healthcare information is unparalleled in scope and scale. Tailored audiences leverage machine learning modeling to correlate consumer demographics real world patient data.

Cohort segments vary by condition, ranging from 5% to 40% of targetable population for concentrations of probable patients. Audience quality is indexed to national averages observed in IQVIA health datasets. For example, cohort with an AQ index of 250+ is expected to have 2.5 times more likely sufferers.

Syndicated audiences for activation in all major condition categories

Firewalled design and distribution to protect patient and consumer privacy

Options available to design custom cohort models on your brand criteria
