

Wintac and Dispatch FAQs

Now, you can stay connected with the Enterprises that Dispatch works with, without having to retrain your team or switch over to a new tool. By signing up to connect Dispatch and Wintac, you can automatically integrate with several home warranty companies, HVAC manufacturers, Home Advisor, and more with no change in your day-to-day scheduling and dispatching operations.

Why Connect Dispatch with Wintac:

- 1 Get and return work order status automatically for applicable warranty companies, lead generators, and your own booking page with one simple connection to Dispatch, and without logging into different portals to provide status.
- 2 Get surveys back on connected jobs, so you'll always know how your team is doing.
- 3 Get work orders and leads in real-time in Wintac, eliminating data entry for your team.
- 4 Your team doesn't have to learn anything new or change how they work—Dispatch works in the background with your Wintac software.

Demos and Resources

For a demo of how the integration between Wintac and Dispatch works, please reach out to sales@davisware.com

FAQs

How do I sign up? What's the cost?

What Enterprises does Dispatch work with?

What else do I get?

I'd like to suggest some improvements to the integration, or ask more questions on how it works.

All you need to do is reach out to your representative at Wintac. They will speak to you about costs and setup. Email them at sales@davisware.com

We work with most home warranty companies, HVAC manufacturers, Home Advisor, SubZero, and more. Please reach out to sales@davisware.com for an up-to-date list.

Dispatch.me will send surveys on all of your connected work orders, and you will get responses back in Wintac reporting. You can also get a booking page to add to your website to get new leads directly in Wintac.

We love hands-on users! As we add more Wintac users, we'll look to you for feedback. Please let us know your thoughts at support@dispatch.me
